Selected by: Ruud Leurs

<b>Requirement</b>	<b>Business Continuity Requirement Management</b>
<b>Description</b>	Yearly, or in case of newly developed or significantly changed functionality, the services, service components and applications and their continuity requirements must be reviewed or determined by the service, service component or application owner. Business Continuity requirements must reflect customer, contractual, regulatory, internal quality requirements and social demands.
<b>Supplement</b>	The requirements for (critical) services, service components and applications regarding availability and maximum impact of severe incidents must be set by executive management. These requirements can be: maximum impacted customers from one failure, maximum unavailability, maximum dataloss, regional or nationwide impact.
